Silverwork for Glass Class

This is a two day class.

Glass is a very popular medium for jewellery, especially dichroic glass. Commercial findings - like earring hooks, chains and clasps - are readily available and mean you can quickly wear your glass jewellery with pride.

Maybe you're like other glass artists who've found that as they get more experienced, they begin to wonder what it would be like to create their own findings, making their jewellery totally unique. Perhaps you have ideas for including specific designs of clasp or earring hook into your work but lack the silverwork skill or confidence to make them a reality.

To help glass artists who want to learn how to make things like earring hooks, jump rings and clasps, we've created this course. You'll learn about working in sterling silver, how to bend and harden your wire to create springy earring hooks that are durable and last a lifetime.

You'll learn how to make simple clasps for your necklaces so your jewellery is truly hand made. Wire bending and shaping will be covered, building your confidence in handling sterling.

Once you have the basics under your belt, you'll begin to create more complicated findings, learn how to make jump rings and simple chains.

This class will equip you to create unique findings, incorporating your own design ideas and allowing you to put your own personality into every aspect of your glass jewellery.

Your tutor for this class will be Lisa Cain.

Things to consider before booking this course...

This course is suitable for beginners who have no prior knowledge or experience of working with silver.
